### 2009 Section 43 Inflation Adjustment

#### Notice 2009-73

Section 43(b)(3)(B) of the Internal Revenue Code requires the Secretary to publish an inflation adjustment factor. The enhanced oil recovery credit under § 43 for any taxable year is reduced if the "reference price," determined under § 45K(d)(2)(C), for the calendar year preceding the calendar year in which the taxable year begins is greater than \$28 multiplied by the inflation adjustment factor for that year. The credit is phased out in any taxable year in which the reference price for the preceding calendar year exceeds \$28 (as adjusted) by at least \$6.

The term "inflation adjustment factor" means, with respect to any calendar year, a fraction the numerator of which is the GNP implicit price deflator for the preceding calendar year and the denominator of which is the GNP implicit price deflator for 1990.

Because the reference price for the 2008 calendar year (\$94.03) exceeds \$28 multiplied by the inflation adjustment factor for the 2008 calendar year (\$42.01) by \$52.02, the enhanced oil recovery credit for qualified costs paid or incurred in 2009 is phased out completely.

Table 1 contains the GNP implicit price deflator used for the 2009 calendar year, as well as the previously published GNP implicit price deflators used for the 1991 through 2008 calendar years.
